International Political Economy
Contrasting World Views

Raymond C. Miller, San Francisco State University, USA

‘Ray Miller carefully outlines three competing visions of international political economy. He is admirably fair in his treatment of each, carefully outlining their strengths and weaknesses. The scholarship is impressive: Ray Miller clearly knows what he is talking about. The writing is crisp and clear. No other text in the field comes close to providing such a detailed and even-handed treatment of these three visions. Students using this text should thus be able to choose among these perspectives on their merits, and indeed integrate elements of each in order to generate a more holistic and nuanced understanding of IPE.’

- Rick Szostak, University of Alberta, Canada

This is a textbook that will be appreciated by both teachers and students of international political economy. It helps readers to make critical sense of the field by carefully ‘unpacking’ the assumptions that underlie major schools of thought in IPE and explaining how the assumptions of each school connect to their analyses and policy prescriptions. Its full discussion of Keynesian perspectives, as well as its treatment of vital global environmental issues and critical ‘green IPE’ perspectives—shortchanged in many other texts—make it an excellent choice for undergraduate courses.’

- Glenn Fieldman, San Francisco State University, USA

This textbook is the perfect short introduction to the fundamental models and issues of international political economy (IPE).

International Political Economy
Debating the Past, Present and Future

Edited by Nicola Phillips, University of Manchester, UK and Catherine Weaver, University of Texas at Austin, USA

‘This book captures the best contributions to the absorbing conversation that IPE has had with itself over the past few years about its origins, achievements and identity. It is essential reading for everybody interested in this important and growing part of the intellectual landscape of the contemporary social sciences.’

- Anthony Payne, University of Sheffield, UK

‘This is an excellent book, edited by Phillips and Weaver, two of the field’s rising stars and increasingly prominent voices of measured, productive debate. Phillips and Weaver have framed the controversy between liberal and realism in IPE with a smart, thoughtful introduction and brought together an outstanding collection of essays on the state of IPE. The editors have produced a volume of required reading for the next several generations of students and scholars.’

- Rwai Abdelal, Harvard Business School, USA

The book gathers together a set of lively, provocative essays by leading voices in International Political Economy to debate the evolution of the field, its current state and its future directions.

NEW

**Capital and Power**

Political Economy and Social Transformation

John Girling

Series: Routledge Revivals

First published in 1987, this book comprises a critical evaluation of Marxian, Gramscian and pluralist theories of social development; the application of these theories, chiefly to Third World countries: hence consideration of the problems of 'specificity', general theory and social change. This is followed by an assessment of the stages of economic development in relation to state power and politics; and the role of the 'external': the impact of the world market economy and the security imperative.

The book is not a discussion of theory, but of theory-in-practice. Above all, it represents a continuing effort to apply theory to the current economic and political moorings in the 19th century. It offers a historical perspective on current IPE concerns, and links IPE with the growing field of contextualist intellectual history.

**Selected Contents:**

1. The Crisis and the Capitalist System
2. 'Its Patrimony, its Unique Wealth!' Labour-Power, Working Class Consciousness and Crises: An Outline Consideration
3. From Marx to Goldman Sachs: The Fictions of Fictitious Capital, and the Financialization of Industry
4. Value, Price and Epic Recession
5. US Economic Performance from 1929 to 2008 in Terms of the Marxist Theory of Crises, with Some Notes on the Recent Financial Crisis
6. Greece and the World Capitalist Crisis
7. Iran's Political and Economic Crises

**Beyond Western Economics**

Remembering Other Economic Cultures

Trent Schroyer, Ramapo College of New Jersey, USA

This book combines intellectual history with contemporary events to offer a critique of mainstream economic thought and its neoliberal policy incarnation in global capitalism. The critique operates both theoretically, at the level of metaphysics and the philosophy of science, and concretely, in case studies of globalization and world events.

**Capital as Power**

A Study of Order and Cruorider

Jonathan Nitzan, York University, Canada and Shimshon Bichler

Series: RIPE Series in Global Political Economy

"In Capital as Power Jonathan Nitzan and Shimshon Bichler address one of the oldest theoretical conundrums in the discipline of political economy – the theory of capital – with a view to supplying a more satisfactory answer to the question 'what is capital?' While the work clearly fits into the tradition of radical political economy it is not easy to place it in any one school, and this for very good reason: Nitzan and Bichler are trying to create a new approach to political economy." - Jordan Brennan, Canadian Journal of Political Science 42 (4, December): 1057-1058

The book presents a radically new framework for understanding capital as a mode of power. Challenging the liberal and Marxist approaches, it articulates a new theory of accumulation, develops new empirical methods of research and offers a new history of capitalism.

**Selected Contents:**

1. Why Write a Book About Capital?

Global Monetary Governance

Benjamin J. Cohen

“Benjamin J. Cohen was present at the creation of International Political Economy and as its most prolific scholar has done much to influence the subsequent course of this subject. This collection of essays provides an indispensable overview of his work on the politics of international money and finance, but more than this, it offers a compelling assessment of the causes and consequences of the rise of global capital markets. Essential reading for all students of global monetary and financial affairs.” — Andrew Walter, London School of Economics, UK

‘Global Monetary Governance is the greatest hits album IPE students and scholars will line up around the block to get a copy of. Four decades of the best of Cohen – this collection brings together many of his important contributions on the politics of international monetary and finance.’ — Jonathan Kirshner, Cornell University, USA

Modern Political Economics

Making Sense of the Post-2008 World

Yanis Varoufakis, University of Athens, Greece, Joseph Halevi, University of Sydney, Australia and Nicholas Theocharakis, University of Athens, Greece

In 2008, not only did the financial system collapse, and send the real economy into a tailspin, but it also revealed the great gulf separating economics from a very real capitalism.

Modern Political Economics has a single aim: To help readers make sense of how 2008 came about and what the post-2008 world has in store.

Savage Economics
Wealth, Poverty and the Temporal Walls of Capitalism

David L. Blaney, Macalester College, USA and Naeem Inayatullah, Ithaca College, USA

“For too long the field of political economy has been dominated by technocratic analyses of market equilibria and inchoate rants about the evils of capitalist oppression. Inayatullah and Blaney’s book suggests a profound reorientation of the entire discussion away from both minutiae and sweeping generalization, and towards the kind of close reading that can generate a potent form of immanent critique. Their incisive discussion of some of the tradition’s key texts discloses resources for ethical and political reflection that have been long obscured by the dominant mainstream reading of authors like Smith and Marx; our past is brought into dialogue with our present in a way that cannot help but dislocate the supposedly eternal verities of modern-day economics. This should be required reading for everyone who produces or consumes, especially for those producing and consuming political-economic knowledge.” - Patrick Thaddeus Jackson, American University, USA

Routledge Handbook of International Political Economy (IPE)
IPE as a Global Conversation

Edited by Mark Blyth, Johns Hopkins University, USA

The study of the International Political Economy (IPE), like the IPE itself, is plural and unbounded. Despite what partisans sometimes say, rather than there being ‘one way’ of studying the IPE that is the ‘right way’, we find across the world great variation in IPE scholarship in terms of focus, questions, and methods. How then can we make sense of this and understand the field as a whole rather than simply learn one part of it?

This Handbook is designed to address precisely this concern. It maps the shifting boundaries and diverse theoretical commitments of IPE around the world. It engages the geographical and theoretical diversity of the different versions of IPE found in North America, the UK, in Asia and Australia; and notes the absences of distinctive versions of IPE in Europe and Latin America. The volume groups together the essential attributes and positions of each school, inviting the reader to engage with and learn about IPE in all of its guises through this evolving ‘global conversation.’ Rather than adjudicate ‘the one true version’ of IPE, it argues that the intellectual diversity we see around the world is an essential, and positive, feature of the field.

Selected Contents:
1. The Multiple Traditions of American IPE
2. Realist Political Economy: Traditional Themes and Contemporary Challenges
3. Thinking Rationally about Hierarchy and Global Governance
4. Constructivism as an Approach to International Political Economy
5. Margins, Traditions and Engagements: A Brief Disciplinary History of IPE in Canada
6. Lineages of a British International Political Economy
7. Empiricism and Objectivity: Reflexive Theory
8. Power-Knowledge Estranged: From Susan Harding to Rikard Sjöberg
9. The Savage Smith and the Temporal Walls of Capitalism
11. Exclusions, and Extensions
12. The Rise of East-Asia: An Emerging Intellectual Diversity
13. Neither Asia nor America: IPE in Australia
14. The Global Conversation
15. Why Did the Latin American Critical Tradition in Exclusions, and Extensions Disappear?
16. What Do Sociologists Bring to International Political Economy
17. Economic History and the Social Sciences Become Practically Extinct?
18. Everyday International Political Economy
19. Markets: The Developmental State Debate as the Distinctive Versions of IPE in North America, the UK, in Asia and Australia; and notes the absences of distinctive versions of IPE in Europe and Latin America.

Selected Contents:
Introduction: IPE as a Global Conversation
Section 1: North American IPE
Section 2: British IPE
Section 3: IPE in Asia

Series: Warwick Studies in Globalisation
Governing the Global Economy presents a fresh approach to the study of international political economy. The book is organised according to the analytical problems of international governance and national adaptation. The distinguished contributors present both theoretical and empirical cases on, amongst others, theories and methodologies, institutions, networks, powers, systems, regimes and industry. With contributions from Peter Katzenstein, Richard Higgott and Eric Helleiner, Governing the Global Economy is essential reading for all students and scholars of international political economy and globalization.

The Political Economy of Aid in Palestine
Relief from Conflict or Development Delayed?
Sahar Taghdisi-Rad, United Nations Conference on Trade and Development (UNCTAD), Switzerland
Series: Routledge Political Economy of the Middle East and North Africa
This book examines the nature of donor operations in Palestine and questions the viability of aid as an instrument of ‘economic development’ in conflict zones. It highlights the political and ideological determinants of aid allocation and effectiveness, arguing that aid to Palestine cannot bring about significant improvement as long as the Palestinian economy is fundamentally affected by Israeli occupation, settlement and blockade.

Development and Globalization

A Marxian Class Analysis

David F. Ruccio, University of Notre Dame, USA

Series: Economics as Social Theory

Since the mid-1980s, David F. Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning, Third World development, and capital globalisation. The aim of this collection is to show, through a series of concrete examples, how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies.

Rethinking Globalizations

Series Edited by Barry Gills, University of Newcastle, UK

This series is designed to break new ground in the literature on globalisation and its academic and popular understanding. Rather than perpetuating or simply reacting to the economic understanding of globalisation, this series seeks to capture the term and broaden its meaning to encompass a wide range of issues and disciplines and convey a sense of alternative possibilities for the future.

Globalization
North-South Perspectives
John Glenn

‘This is an excellent book and one that represents a significant contribution to the existing literature.’ - Nana K. Poku, University of Bradford, UK

‘John Glenn makes a valuable contribution to the third wave of globalization studies. With a particular focus on the position of the South his work presents significant challenges to the orthodoxies of both skeptics and advocates of globalization alike. It therefore deserves to be widely read.’ - Tony McGrew, University of Southampton, UK

Transnationalism
Steven Vertovec, Max-Planck-Institute, Germany

Series: Key Ideas

Transnationalism refers to multiple ties and interactions linking people or institutions across the borders of nation-states.

This book surveys the broader meanings of transnationalism within the study of globalization before concentrating on migrant transnational practices. Each chapter demonstrates ways in which new and contemporary transnational practices of migrants are fundamentally transforming social, political and economic structures simultaneously within homelands and places of settlement.

Transnationalism provides a much-needed single, clear and condensed text concerning a major concept in academic and policy discourse today.

The book is for advanced undergraduate students, postgraduates and academics.

Marxism and World Politics
Contesting Global Capitalism
Edited by Alexander Anievas, University of Cambridge, UK

‘Over the past few years, a distinctly Marxian approach to the study of international relations has been steadily gathering steam. This volume brings together a number of the most interesting proponents of that approach. Unlike most edited volumes, this one coheres remarkably well, owing largely to the common framework that binds the essays together. But Anievas also uses great judgment in choosing essays that that show the tensions and debates within this resurgent Marxian theorizing. This is a volume that will appeal to all scholars interested in the evolution and current dynamics of the interstate system.’

World Trade Politics
Power, Principles and Leadership
David A. Deese

“World Trade Politics is a masterful work of historical analysis that makes a signal contribution to the field of International Political Economy. Combining meticulous empirical research with an unusually comprehensive reading of the formal literature, Deese develops an integrated theory of political leadership in international negotiations that is at once eclectic and nuanced. His tracing of the evolution of the GATT/WTO regime has applicability far beyond the issue of trade relations alone.” - Benjamin Jerry Cohen, University of California, Santa Barbara, USA

**Global Poverty**

*How Global Governance is Failing the Poor*

David Hulme, University of Manchester, UK

Around 1.4 billion people presently live in extreme poverty, and yet despite this vast scale, the issue of global poverty had a relatively low international profile until the end of the 20th century. In this important new work, Hulme charts the rise of global poverty as a priority global issue, and its subsequent marginalisation as old themes edged it aside (trade policy and peace-making in importance) and new issues were added (terrorism, global climate change and access to natural resources).

Providing a concise and detailed overview of both the history and the current debates that surround this key issue, the book:  
- outlines how the notion of global poverty eradication has evolved  
- evaluates the institutional landscape and its ability to attack global poverty  
- analyses the conceptual and technical frameworks that lie behind the contemporary understanding of global poverty (including human development, dollar a day poverty and results-based management)  
- explores the roles that major institutions have played in promoting and/or obstructing the advancement of actions to reduce poverty  
- discusses the emerging issues that are re-shaping thinking, and the future prospects for global poverty eradication.

The first book to tackle the issue of global poverty through the lens of global institutions; this volume provides an important resource for all students and scholars of international relations, development studies and international political economy.

**Human Development**

Richard Ponzo, Department of State, USA

The purpose of the book is to examine the conceptual evolution of “social development” during the post-colonial era, and see how various institutions of the UN system have tried to engage with this issue, both in terms of intellectual and technical advance, and operationally.

**Non-Governmental Organizations in World Politics**

*The Construction of Global Governance*

Peter Willetts, City University, London, UK

This accessible and informative textbook provides a comprehensive overview of the significant role and increasing participation of NGOs in World Politics, and includes an evaluation of the enhanced communication offered by the creation of the Internet.

Peter Willetts examines the variety of different NGOs, their structure, membership and activities and their complex relationship with social movements and civil society. How NGOs influence global policymaking and the status of NGOs within international law is discussed, as well as the lack of discussion of NGOs within mainstream international relations theory.

This is the definitive guide to this crucial area within international politics and should be required reading for students, NGO activists and policymakers.

**Selected Contents:** Introduction 1. NGOs, Social Movements, and Civil Society 2. The Access of NGOs to Global Policy-Making 3. The Status of NGOs in International Law 4. NGOs, Networking and the Creation of the Internet 5. Understanding the Place of NGOs in Global Politics 6. The Creation of Global Governance

The World Bank
From Reconciliation to Development to Equity
Katherine Marshall, The World Bank, Washington DC, USA

‘This slim volume is an invaluable aid to students of international law and international relations and anyone interested in the challenges of development for the vast majority of the world’s population. It is clear, immensely readable, and infused with a lively appreciation of the World Bank’s peculiar quirks and complexities. Often maligned and even more frequently misunderstood, the Bank plays a critical role both in global governance and global development policy. Katherine Marshall is an able and authoritative guide to its many rules and roles.’ - Anne-Marie Slaughter, Princeton University, USA

United Nations Conference on Trade and Development (UNCTAD)
Ian Taylor and Karen Smith

Ian Taylor and Karen Smith present a much-needed and full examination of the United Nations Conference on Trade and Development (UNCTAD), covering its history and current activities. All the key areas are covered by acessibly written chapters, including:

- an overview of UNCTAD: what it is, why it was formed and why it is important
- how the organization operates today: what it does and how it does it
- key criticisms made against the organization: is it relevant in today’s world?
- emerging issues within the organization and its future direction.

In the current era of globalization and what appears to be the dominance of neo-liberal economic thought, UNCTAD has sought to make itself germane to ongoing international debates. The implications of this for the organization’s key remit, namely making the world a fairer place, are something that this book unpacks.

The Bank for International Settlements
The Politics of Global Financial Supervision in the Age of High Finance
Kevin V. Ozgercin, SUNY College at Old Westbury, USA

Despite playing a pivotal role in the liberalization and globalization of finance since the late 1950s, and being the principal center for bank supervision, the Bank for International Settlements (BIS) is perhaps the most obscure and under-researched of the major global financial institutions. This book offers readers the only available definitive guide to understanding the BIS’s identity and institutional make-up, as well as its role in the global financial system. It examines the internal governance and policy outputs of the BIS and provides a critical analysis of its evolution as the principal international center for central bank cooperation and the establishment international rules and standards for supervising internationally active banks. The BIS is often depicted as playing a supportive role to the IMF, G-8, World Bank, OECD, and regional development banks in the management of global finance.

Ozgercin illuminates the role of the BIS in the existing architecture of global financial institutions, thus highlighting significant institutional differences. The proposed book will illustrate that compared to the other major global financial institutions, which are linked directly to governments through their treasuries, the BIS constitutes a uniquely independent, market-led approach to global financial governance, emphasizing the self-regulation of market institutions.

A comprehensive yet concise and accessible introduction to the BIS, it will be of interest to students from a wide range of disciplines including Politics and International Studies, History, Sociology, Economics, and Finance.

Democratization and Market Reform in Developing and Transitional Countries

Think Tanks as Catalysts

James G. McGann, University of Pennsylvania, USA
Series: Routledge Research in Comparative Politics

This book explores the pivotal role of think tanks in the democratization and economic reform movements by evaluating their overall effect on the transformation process in developing and transitional countries around the world.

James G. McGann assesses twenty-three think tanks, located in nine countries and four regions of the world: Chile, Peru, Poland, Slovakia, South Africa, Botswana, the Philippines, Thailand, and Vietnam, that have most impacted political and economic transitions in their respective countries. The author examines the role they played in the process of democratization and market reform during the late 80s and 90s and identifies the importance of think tanks in these processes by evaluating their overall effect on the policymaking process. He argues in the early stages of a transition from an authoritarian regime to an open and democratic society the activities of think tanks are especially critical, and they have provided a civil society safety net to support these fragile democracies.

This book will be of interest to students and scholars of political science, democratization, development, economic development and civil society.

Global Politico-Economic Crises

The Pragmatic Approach

Keiichiro Komatsu, Komatsu Research & Advisory, UK
Series: Routledge Studies in the Modern World Economy

The 1997 Asian Crisis and 9/11 were turning points for the world economy. The two events reminded the western world of the dynamic impacts of globalisation and the increased uncertainty the world was facing. This book examines the threats to the world economy arising in the wake of the tragedy of 11th September 2001 and the preceding Asian financial crisis of 1997. The author makes the point that a distinctive ‘1990s-type’ global capitalist system was the victim of these attacks, so that an appreciation of the peculiarities of this system is essential to an examination of the specific threats that it is likely to face in future and the policy measures necessary to deal with them.

As an international relations specialist working for a Japanese trade organization both in Britain and Japan itself, the author has a somewhat uniquely privileged vantage point from which to observe, analyze and evaluate the future tendencies and dangers of the new global system. The book cuts across economics and politics and as such will be of use to a wide audience within both of these disciplines.

The Institutional Dynamics of China’s Great Transformation
Edited by Xiaoming Huang, Victoria University of Wellington, New Zealand
Series: China Policy Series
This book examines the role of institutions in China’s recent large-scale economic, social and political transformation. Unlike existing literature, it offers perspectives from a variety of disciplines - including law, economics, politics, international relations and communication studies – to consider whether institutional forms, evolve and change differently according to their historical or cultural environments and if their utilitarian functions can, and should be, observed, identified and measured in different ways.

Peter W. Preston, University of Manchester, UK
Series: Routledge Studies in the Modern History of Asia
This book compares national processes as well as the current processes of change taking place in Europe and East Asia, including the dynamics of the European Union in Europe and the re-emergence of the historical centre of China in East Asia. It argues that as the change unfolds in the economic, social and political fields, the various national pasts embedded with the politics of the two regions will also need to be revisited and reworked.

Understanding India’s New Political Economy
A Great Transformation?
Edited by Sanjay Ruparelia and Sanjay Reddy, both at The New School for Social Research, John Harris, Simon Fraser University, Canada and Stuart Corbridge, London School of Economics, UK
Since 1989, a number of large-scale transformations have reshaped India. This textbook provides a detailed account of three that are of particular importance: the advent of liberal economic reform, the ascendancy of Hindu cultural nationalism, and the empowerment of historically subordinate classes through popular democratic mobilizations.

• explain the empirical linkages between these three phenomena
• provide an account that integrates the insights of separate disciplinary perspectives
• explain their distinct but possibly related causes and the likely consequences of these central transformations taken together.

Chapters focus on the political, economic and social aspects of India in the current as well as the historical context since the country’s independence. Based on empirical findings, contributors discuss how the multilevel and multidirectional growth story of India is likely to develop. This is an essential text for students and researchers of India’s political economy and the growth economies of Asia.

**Politics in India**

Structure, Process and Policy

Subrata K. Mitra, University of Heidelberg, Germany

Providing a comprehensive analysis of the broad spectrum of India’s politics, this undergraduate textbook explains the key features of politics in India in a comparative and accessible narrative, illustrated with relevant maps, life stories, statistics and opinion data. Familiar concepts of comparative politics are used to highlight the policy process, with a focus on anti-poverty measures, liberalisation of the economy, nuclearisation and relations with the United States and Asian neighbours such as Pakistan and China.

The author raises several key questions relevant to Indian politics, including:

- Why has India succeeded in making a relatively peaceful transition from colonial rule to a resilient, multi-party democracy in contrast to her neighbours?
- How has the interaction of modern politics and traditional society contributed to the resilience of post-colonial democracy?
- How did India’s economy – moribund for several decades following independence – make a breakthrough into rapid growth, and, can India sustain it?

Strategic Partnerships in Asia

Balancing without Alliances

Vidya Nadkarni, University of San Diego, USA

This book examines the nature and implications of the increasing interaction among the three secondary powers in the world: China, Russia and India. It provides an in-depth analysis of the complex and often contradictory goals underlying their emerging strategic partnerships along with an assessment of the role these partnerships play in the larger regional and global contexts. In particular, it focuses on the important region of Asia-Eurasia, where these countries seek to increase their influence and compete against the prominence of the United States.

The American Political Economy
Institutional Evolution of Market and State
Marc Allen Eisner, Wesleyan University, USA

Policy debates are often grounded within the conceptual confines of a state-market dichotomy, as though the two existed in complete isolation. In this innovative text, Marc Allen Eisner portrays the state and the market as inextricably linked, exploring the variety of institutions subsumed by the market and the role that the state plays in creating the institutional foundations of economic activity.

Through a historical approach, Eisner situates the study of American political economy within a larger evolutionary-institutional framework that integrates perspectives in American political development and economic sociology. This volume provides a rich understanding of the complexity of U.S. economic policy, explaining how public policies become embedded in bureaucracy and reinforced by organized beneficiaries and public expectations. This path dependent layering process helps students better understand the underlying historical dynamics, which provide a clearer sense of the constraints faced by policymakers now and in the future. Through careful analysis of the entitlement crisis, globalization’s impact on the U.S. political economy, and the recent financial crisis in the final chapters, demonstrate the importance of this historical institutionalist framework.

Selected Contents:
1. Beyond the Market-State Dichotomy
2. Making Sense of Institutions and Institutional Change
3. The Evolution of the American Political Economy
4. The Progressive Regime and the Regulatory State
5. The Rise of the New Deal Regime
6. The Postwar Consolidation of the New Deal Regime
7. The Rise and Pause of the Keynesian Welfare State
8. The Neoliberal Regime and the Return of the Market
9. Neoliberalism and its Discontents

Dying Empire
U.S. Imperialism and Global Resistance
Francis Shor, Wayne State University, USA

‘As Americans try to make sense of today’s pressing global economic and environmental crises, Dying Empire provides an engaging and accessible framework through which readers can understand the United States role in the world. Drawing from a refreshing range of social science and cultural materials (including Marge Piercy and Bob Marley, among others), Shor articulates a convincing and passionate call for Americans to embrace global citizenship.’ - Jackie Smith, University of Notre Dame, USA
