Bilingualism and Multilingualism

CRITICAL CONCEPTS IN LINGUISTICS

Edited and with a new introduction by Li Wei, Birkbeck, University of London, UK

This four-volume Major Work on Bilingualism and Multilingualism will showcase the major achievements in this multidisciplinary field, through the inclusion of the most important, as well as controversial, works that lie at the forefront of bilingualism and multilingualism research. Although scientific studies of the language behaviour of polyglots began to appear in the nineteenth century, it is only in the last fifty years or so that bilingualism and multilingualism have been recognized as crucial areas of linguistic research. This new four-volume collection from Routledge showcases the major achievements in this now vibrant multidisciplinary field.
