The Handbook of Employee Selection provides a comprehensive review of a) contemporary personnel selection instruments, including the technical methodology for their development and evaluation of their effectiveness, b) the organizational systems necessary for the effective and efficient use of personnel selection methods as part of organizations’ human resource management approach, and c) the societal and organizational factors that provide the context within which personnel selection is nested. The Handbook includes descriptions of specific examples of personnel selection procedures that have had major impact on the development of personnel selection function within organizations, as well as discussions of current and future trends in employee selection around the world.

James L. Farr is Professor in the Department of Psychology, Pennsylvania State University. His PhD is from the University of Maryland in Industrial Psychology, Psychological Statistics and Measurement. He has been our journal editor of Human Performance (2000–2006) and Editor of TIP from 1986–1989. He has written (with Frank J. Landy) The Measurement of Work Performance, Academic Press, 1983; (with Michael A. West) Innovation and Creativity at Work, Wiley, 1990; and (with Heinz Schuler and Mike Smith) Personnel Selection and Assessment, LEA, 1993.

Nancy T. Tippins received her PhD in Industrial and Organizational Psychology from Georgia Institute of Technology. She currently works at Valtera Corporation as Senior Vice President, Selection Practice Group. She is a Fellow of SIOP and APA and Past President of SIOP (2001–2002). She has served on the editorial boards of Personnel Psychology, Journal of Applied Psychology, and The Psychologist Manager Journal.

“James L. Farr and Nancy T. Tippins have produced a ‘must have’ handbook on employee selection for anybody engaged in the selection and recruitment of talent at work, and for all students and academics in HR and personnel/occupational psychology. It contains most of the international leading lights in the field. It not only includes the state-of-the-art research in this arena, but also how this can be translated into effective practice. A bookshelf in HR is not complete without this volume.”
- Cary L. Cooper, CBE, Distinguished Professor of Organizational Psychology and Health at Lancaster University Management School

“SIOP emphasizes the scientist-practitioner model. Who exemplifies this model more in the field of selection than Drs Farr and Tippins? The new Alliance of Organizational Psychology includes EAWOP, Division 1 of IAAP, and SIOP members. This book includes the perspectives of authors with a global view of selection. There is simply no more authoritative text on the planet than this one for members of the Alliance.”
- Gary Latham, Secretary of State Professor of Organizational Psychology, Rotman School of Management, University of Toronto, and Past President of the Canadian Psychological Association and the Society for Industrial-Organizational Psychology

“Farr and Tippins have assembled an impressive line-up of leading scholars in the field to present a comprehensive and up-to-date treatment of employee selection. Broad in scope and rich in content, the Handbook of Employee Selection offers an evidence-based perspective on the design, implementation, and evaluation of selection systems in organizational contexts. The handbook also offers an in-depth treatment of criterion development, important legal and ethical issues in employee selection, and an in-depth discussion of the unique selection associated with various organizational contexts, including the military, blue collar occupations, and multinational corporations. This book is a must-read for practitioners and academics alike, and is positioned to have a major impact on the field of employee selection.”
- Lillian T. Eby, Professor of Psychology, University of Georgia, and Associate Editor of Personnel Psychology

“Farr and Tippins’ Handbook of Employee Selection is an impressive compilation of chapters written by leaders in the field covering a) psychometric issues, b) design, implementation, and evaluation issues, and c) historical and legal contexts relating to selection of employees in organizations. Chapters are, at the same time, sophisticated and readable. They summarize the state of the science and practice to date, and provide signposts to the future of employee selection. Many of the handbook’s chapters will be citation classics well into the 21st Century. It’s on my bookshelf and should be on yours too!”
- Charles E. Lance, Professor of Psychology, University of Georgia, and Associate Editor of Organizational Methods Research

“Farr and Tippins have assembled the definitive who’s who in employee selection.”
- Milton D. Hakel, Professor of Psychology, Bowling Green State University
